SKILLS

- **Languages:** Java, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Spring Boot, Spring Data JPA, Hibernate, Socket.io
- **Tools/Platforms:** MySQL, PostgreSQL, MongoDB, GitHub, Postman
- **Soft Skills:** Analytical-Thinking, Adaptability, Leadership

PROJECTS

BankiFy – Scalable RESTful Banking Backend System | [Link](#)

June 2025 – July 2025

- Architected and delivered 9+ RESTful APIs using Spring Boot for core banking operations (accounts, transactions, transfers), enforcing ACID-compliant workflows with @Transactional to ensure consistency under concurrent requests.
- Designed a scalable backend using layered architecture (Controller–Service–Repository) with Spring Data JPA and Hibernate, applying DTO abstraction to decouple business logic from persistence models and enhance security.
- Implemented centralized exception handling with @ControllerAdvice, standardizing error responses into structured formats and improving API reliability and client-side integration.
- **Outcome:** Improved system robustness and developer efficiency through comprehensive API validation, optimized query performance, and consistent HTTP standards across all endpoints.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, Hibernate ORM, MySQL, REST API Design, OOPS

ConvoX – Real-Time Full-Stack Messaging Platform | [Link](#)

March 2025 – April 2025

- Built ConvoX, a real-time chat platform using React, Spring Boot, Web Sockets and MySQL, delivering sub-50ms message latency across concurrent sessions.
- Engineered secure, stateless authentication with Spring Security and JWT, safeguarding APIs and enabling scalable, role-based access control.
- Developed event-driven real-time features (typing indicators, read receipts, replies, reactions, media messaging), ensuring consistent cross-client synchronization.
- Reduced chat load latency and UI flicker by optimizing state management, caching, and pagination, enabling smooth, navigation.
- **Outcome:** Optimized media delivery pipeline with asynchronous processing and compression, improving load performance and enhancing UX across low-bandwidth conditions.
- **Tech Stack:** React.js, Spring Boot, Spring Security, JWT, Web Sockets, MySQL, REST APIs

TRAINING

Summer Training – Java Core to Advance:

June 2025 – July 2025

- Completed structured training on Core to Advanced Java concepts: OOP principles, Collections Framework, Exception Handling, Multithreading, and JDBC; applied concepts to build a full end-to-end Java application demonstrating real-world application design.
- Implemented data-structure-optimized algorithms and exception-safe JDBC database operations; strengthened problem-solving and debugging skills through hands-on project development and code optimization exercises.

CERTIFICATES

- Master Generative AI & Generative AI tools by Infosys | [Link](#)

August 2025

- Java: Core to Advance by Board Infinity | [Link](#)

June 2025

- Social Networks by NPTEL | [Link](#)

May 2025

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.12**

Punjab, India

August 2023 - Present

Delhi Public School

Intermediate; **Percentage: 84.4**

Bulandshahar, Uttar Pradesh

April 2022 - March 2023

Delhi Public School

Matriculation; **Percentage: 93.2**

Bulandshahar, Uttar Pradesh

April 2020 - March 2021
