Projects

BankiiFy – Scalable RESTful Banking Backend System | Java, SpringBoot **Jun 2025 - Jul 2025**

- Architected and delivered 15+ RESTful APIs using Spring Boot for core banking operations (accounts, transactions, transfers), enforcing ACID-compliant workflows with @Transactional to ensure consistency under concurrent requests.
- Designed a scalable backend using layered architecture (Controller–Service–Repository) with Spring Data JPA and Hibernate, applying DTO abstraction to decouple business logic from persistence models and enhance security.
- Implemented centralized exception handling with @ControllerAdvice, standardizing error responses into structured formats and improving API reliability and client-side integration.
- **Outcome:** Improved system robustness and developer efficiency through comprehensive API validation, optimized query performance, and consistent HTTP standards across all endpoints.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, Hibernate ORM, MySQL, REST API Design, OOPS
- Link: GitHub

ConvoX – Real-Time Full-Stack Messaging Platform | *React,* SpringBoot **Mar 2025 - Apr 2025**

- Built ConvoX, a real-time chat platform using React, Spring Boot, WebSockets and MySQL, delivering sub-50ms message latency across concurrent sessions.
- Engineered secure, stateless authentication with Spring Security and JWT, safeguarding APIs and enabling scalable, role-based access control.
- Developed event-driven real-time features (typing indicators, read receipts, replies, reactions, media messaging), ensuring consistent cross-client synchronization.
- Reduced chat load latency and UI flicker by optimizing state management, caching, and pagination, enabling smooth, navigation.
- **Outcome:** Optimized media delivery pipeline with asynchronous processing and compression, improving load performance and enhancing UX across low-bandwidth conditions.
- **Tech Stack:** React.js, Spring Boot, Spring Security, JWT, WebSockets, MySQL, REST APIs
- Link: GitHub

Training

Summer Training | Java: Core to Advanced

- Completed structured training on Core to Advanced Java concepts: OOP principles, Collections Framework, Exception Handling, Multithreading, and JDBC; applied concepts to build a full end-to-end Java application demonstrating real-world application design.
- Implemented data-structure-optimized algorithms and exception-safe JDBC database operations; strengthened problem-solving and debugging skills through hands-on project development and code optimization exercises.

Certification

Java: Core to Advance **JUNE 2025**

Board Infinity — Link

Skills

Languages: Java, JavaScript, HTML5, CSS3

Frameworks/Libraries: React.js, Spring Boot, Spring Data JPA, Hibernate, Socket.io

Domain Skills: Backend Development, Real-Time Systems, API Design, Authentication, Database Design

Education

- **Lovely Professional University** **2023 – Present**
  Bachelor of Technology - Computer Science and Engineering — CGPA: 8.12 *Phagwara, Punjab*
- **Delhi Public School Bulandshahar** **2022 – 2023**
  12th — Percentage: 84.4 *Bulandshahar, Uttar Pradesh*
- **Delhi Public School Bulandshahar** **2020 – 2021**
  10th — Percentage: 93.2 *Bulandshahar, Uttar Pradesh*
