Mobile: +91-7900375928

Skills

- **Languages**: Java, JavaScript, HTML5, CSS3
- **Frameworks & Libraries**: React.js, Spring Boot, Spring Data JPA, Hibernate, Socket.io
- **Tools/Platforms**: MySQL, PostgreSQL, MongoDB, GitHub, Postman
- **Soft Skills**: Analytical-Thinking, Adaptability, Leadership

Projects

BankiFy – Scalable RESTful Banking Backend System | **Link** June 2025 – July 2025

- Architected and delivered 15+ RESTful APIs using Spring Boot for core banking operations (accounts, transactions, transfers), enforcing ACID-compliant workflows with @Transactional to ensure consistency under concurrent requests.
- Designed a scalable backend using layered architecture (Controller–Service–Repository) with Spring Data JPA and Hibernate, applying DTO abstraction to decouple business logic from persistence models and enhance security.
- Implemented centralized exception handling with @ControllerAdvice, standardizing error responses into structured formats and improving API reliability and client-side integration.
- **Outcome:** Improved system robustness and developer efficiency through comprehensive API validation, optimized query performance, and consistent HTTP standards across all endpoints.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, Hibernate ORM, MySQL, REST API Design, OOPS

ConvoX – *Real-Time Full-Stack Messaging Platform* | **Link** March 2025 – April 2025

- Built ConvoX, a real-time chat platform using React, Spring Boot, WebSockets and MySQL, delivering sub-50ms message latency across concurrent sessions.
- Engineered secure, stateless authentication with Spring Security and JWT, safeguarding APIs and enabling scalable, role-based access control.
- Developed event-driven real-time features (typing indicators, read receipts, replies, reactions, media messaging), ensuring consistent cross-client synchronization.
- Reduced chat load latency and UI flicker by optimizing state management, caching, and pagination, enabling smooth, navigation.
- **Outcome:** Optimized media delivery pipeline with asynchronous processing and compression, improving load performance and enhancing UX across low-bandwidth conditions.
- **Tech Stack:** React.js, Spring Boot, Spring Security, JWT, WebSockets, MySQL, REST APIs

Training

Summer Training – Java Core to Advance: June 2025 – July 2025

- Completed structured training on Core to Advanced Java concepts: OOP principles, Collections Framework, Exception Handling, Multithreading, and JDBC; applied concepts to build a full end-to-end Java application demonstrating real-world application design.
- Implemented data-structure-optimized algorithms and exception-safe JDBC database operations; strengthened problem-solving and debugging skills through hands-on project development and code optimization exercises.

Certificates

- Master Generative AI & Generative AI tools | Link — August 2025
- Java: Core to Advance by Board Infinity | Link — June 2025
- Social Networks by NPTEL | Link — May 2025

Education

Lovely Professional University — *Punjab, India*
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.12*** — *August 2023 - Present*

Delhi Public School — Bulandshahar, Uttar Pradesh
Intermediate; ***Percentage: 84.4*** — *April 2022 - March 2023*

Delhi Public School — Bulandshahar, Uttar Pradesh
Matriculation; ***Percentage: 93.2*** — *April 2020 - March 2021*
